

The high performance computing (HPC) cluster of the School supports advanced research in computational chemistry and biology. The cluster is designed for carrying out large-memory and data-intensive applications involved in computational chemistry, biology, and ‘big data’ research. The cluster comprises of more than 2000 cores in the compute nodes; ~8 TB of main memory; and ~150 TB of local scratch disk (striped Serial Attached SCSI disks and solid-state disks). For more information visit this page.

The specifications of the online nodes are listed below. More nodes will come online soon! For more information of the HPC cluster of the Karton group see: <http://www.chemtheorist.com/hpc.html>

| Node     | Cores | RAM (GB) | Disk type | Disk size (TB) |
|----------|-------|----------|-----------|----------------|
| pople023 | 24    | 24       | SAS       | 0.5            |
| pople024 | 24    | 24       | SAS       | 0.5            |
| pople027 | 24    | 24       | SAS       | 0.3            |
| pople081 | 24    | 24       | SAS       | 2.0            |
| pople082 | 24    | 24       | SAS       | 2.0            |
| pople083 | 24    | 24       | SAS       | 2.0            |
| pople084 | 24    | 24       | SAS       | 2.0            |
| pople085 | 24    | 24       | SAS       | 2.0            |
| pople086 | 24    | 24       | SAS       | 2.0            |
| pople087 | 24    | 24       | SAS       | 2.0            |
| pople088 | 24    | 24       | SAS       | 2.0            |
| pople089 | 24    | 24       | SAS       | 2.0            |
| pople090 | 24    | 24       | SAS       | 2.0            |
| pople091 | 24    | 24       | SAS       | 2.0            |
| pople092 | 24    | 24       | SAS       | 2.0            |
| pople093 | 24    | 24       | SAS       | 2.0            |
| pople094 | 24    | 24       | SAS       | 2.0            |
| pople095 | 24    | 24       | SAS       | 2.0            |
| pople096 | 24    | 24       | SAS       | 2.0            |
| pople097 | 24    | 24       | SAS       | 2.0            |
| pople098 | 24    | 24       | SAS       | 2.0            |
| pople099 | 24    | 24       | SAS       | 2.0            |
